

Emergency Alert!

Pennsylvania State Senator, Daylin Leach, (D 17th) intends to introduce legislation to eliminate the philosophical exemption from the Commonwealth's immunization rule.

This will be a very dangerous law on several fronts:

1. Parents NOT Politicians should decide what is right for their children

2. Vaccines do NOT work. If they did,

--why do vaccinated children have to worry about catching the disease?

--why did most of the [NHL players](#) who were already vaccinated come down with measles?

3. Vaccines are dangerous. If they weren't,

--why does the vaccine industry need [absolute legal immunity](#) from all harm caused by its products yet a special US Vaccine Court awarded over \$2 Billion in damages from vaccines, including proof that they cause Autism.

--why are medical journals replete with examples of outbreaks of measles, mumps, chicken pox and pertussis being almost exclusively among the previously vaccinated, ranging from 85%-99%?

--why did [13 people die](#) recently in Italy after being vaccinated?

4. In America we live in a free country where we have the freedom to exercise self-determination and have freedom of choice. Then why are Politicians saying –

“It’s absurd that anybody thinks that, ‘oh this is just a choice, it won’t affect my child.’ That’s not true and it does,” Rep. Mike Schlossberg (D-Lehigh) told ABC 27. “In my view, liberty and freedom for one parent ends when their liberty and freedom can determinately affect my children or the children of any other parent in Pennsylvania.”

Your freedom and your children’s health are at risk. Martin Niemoller summed it up in a speech

“First they came for the Socialists, and I did not speak out—

Because I was not a Socialist.

Then they came for the sick, the so called incurables, and I did not speak out—

Because I was not sick.

***Then they came for the Jews, and I did not speak out—
Because I was not a Jew.***

Then they came for me—and there was no one left to speak for me.”

We need to have our voices heard.
